MAP 2

SOILS

Soil maps were converted from MassGIS data based on the United States Department of Agriculture & National Cooperative Soil Survey soil survey of Barnstable County, Massachusetts, conducted in 1983.

Information and explanations about the soil data displayed on this map may be found in the United States Department of Agriculture Soil Conservation Service publication: *Massachusetts*, 1993.
Soil Survey of Barnstable County,

 Town Boundary
 Paved Roads
 Major Roads

Street data were derived from several different sources including: aerial photographs taken on April 10, 1995 and April 28, 2001, Global Positioning System (GPS) field surveys, and Town of Barnstable Engineering Department records.

Hydrographic (water-related) features were derived from aerial photographs taken on April 10, 1995.

Physical Features on this map were developed to meet National Map Accuracy Standards.

This map represents a reasonable effort to provide accurate and current information. However, the possibility does exist that this map may contain errors or omissions.

Major Dune

Area of Critical Environmental Concern: 1:25,000 Department of Environmental Management's ACEC book, March 1992.

MacConnell *3) land use categories: 1:25,000, 1990 include Inland Wetland, Salt Wetland, Cranberry Bog, and Forestland.

*3) MacConnell landuse: (digital) June 1990. MacConnell landuse is from aerial photo interpretation (1:25,000 scale). Digitized by the Resource Mapping - Land Information Systems Unit, U.S. Geological Survey, Reston, Virginia. The land use categories are from the EDEA MassGIS project and the Cape Cod Commission. Further explanation of the land use categories may be found in the publication "Remote Sensing 20 Years Change in Barnstable, Dukes, and Nantucket Counties, Mass. 1951 - 1971" W. P. MacConnell, U Mass.

Non- digital data automated by Cape Cod Commission GIS staff using ARC/INFO GIS software.

This map was produced by the Cape Cod Commission's Geographic Information System Department for the "Cape Cod Wildlife Conservation Project".

The map is illustrative and all depicted boundaries are approximate.

It is not intended for survey or legal purposes.

Data Sources:
New information gathered by the "Cape Cod Wildlife Conservation Project" during the Summer of 1998 is shown on this map. It was digitized by the Cape Cod Commission on parcel-based workmaps of scales ranging from 1:9,000 to 1:20,000. See the CCWCP Phase II Report for more information regarding project methodology, development, and application.
*1) Specific forest vegetative types are depicted with all available information. Vegetative cover boundaries will be more precisely located during Phase III.
*2) Significant habitat boundaries are approximate only. Boundaries to be refined during Phase III.
Existing Habitat Information: (Combination of Mass. NHESP, 1995, and APCC 1990). NHESP information includes Certified Vernal Pools, Rare Wetland Wildlife Habitat, and Priority Sites for Rare Species and Natural Communities.
APCC information includes Critical Upland Areas, Uncertified Vernal Pools, and significant communities and habitats from 1:25,000 USGS Quadrangles in the "Cape Cod Critical Habitats Atlas", Association for the Preservation of Cape Cod, 1990, with assistance from the Mass. Natural Heritage Program. The map is illustrative and all depicted boundaries are approximate.

Shellfish Area Status

- Approved
- Conditionally Approved
(Seasonal)
- Restricted
- Prohibited

Shellfish area status displayed on this map are to illustrate written geographical definitions of shellfish areas, as defined by the Massachusetts Division of Marine Fisheries and the Town of Barnstable Natural Resources Office. In the field, signposts, buoys and landmarks are used to assist in the demarcation of written geographical definitions of shellfish areas. Open shellfish areas can close without notice due to acts of man or nature, always check site postings before harvesting.

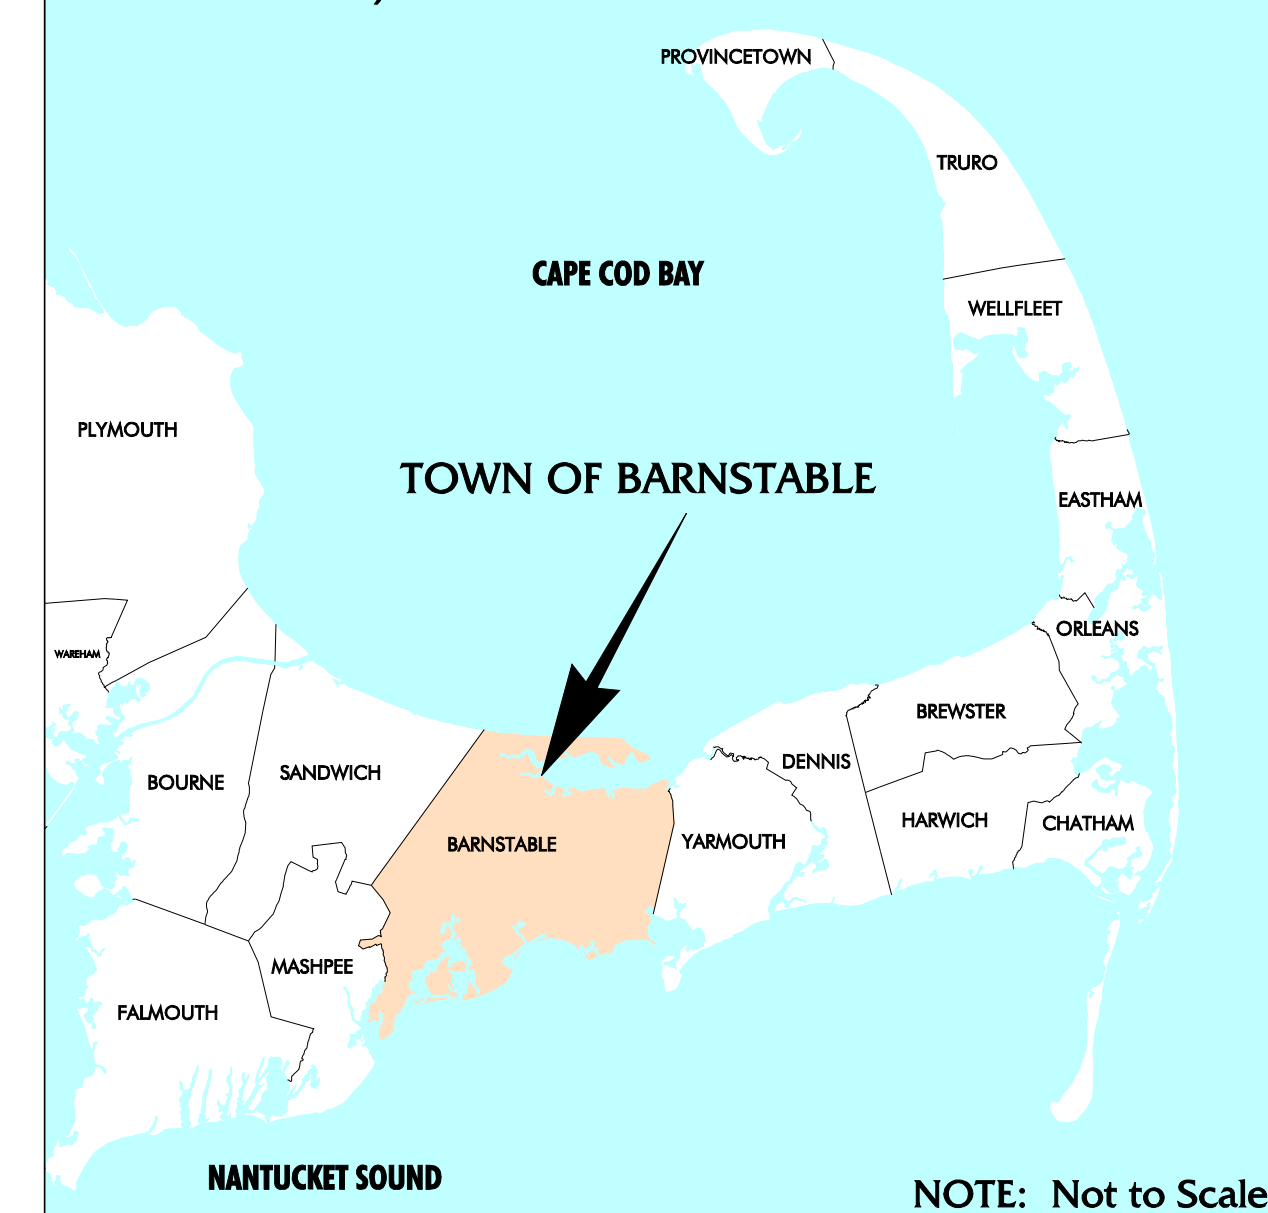

Street data were derived from several different sources including: aerial photographs taken on April 10, 1995 and April 28, 2001, Global Positioning System (GPS) field surveys, and Town of Barnstable Engineering Department records.
