Special Note : All barrels have been re-purposed, unpainted barrels will have markings and a dull, scratched finish. If this is not acceptable please choose a painted barrel. Unpainted barrels can be oiled down to even out finish and acetone or an abrasive to remove markings. We cannot guarantee if you will get black or gray barrel. Customers who have a preference should select from painted barrels.

Dimensions

- 23D x 42H in.
- 60 Gallon Capacity
- Weight: 20 lbs. empty

Lid

- Wide mouth hard top lid, 14" diameter.
- Screw On
- Perforated to receive water

Material

- 3/16" polyethylene
- Recycled Food Grade Plastic Resin
- UV Protected
- BPA Free
- 1 Year Limited Warranty

Parts and Details

- Plastic spigot threaded for hose connection
- Elbow fitting for overflow
- 39" ID flex tube for overflow
- Drain plug
- Insect screen to keep water clear of debris
- Link to other barrels with a .75-inch piece of garden hose (not included)
- Spigot port 4 or 14 inches from ground – you install spigot
- 1 year limited warranty on barrel and parts

What's Not Included

- Save the Rain Diverter
- Polished River Stones

Notes about the Terra Cotta Barrel: the profile of this barrel is slightly different than the Painted and Unpainted barrel. The lid is smaller and placement of the spigot in the lower port is more challenging. Please review the "more info" tab at the top of the page to learn more about spigot placement.

SAVE THE RAIN DIVERTER

\$34

Weight: 2.0 lbs

Availability : In Stock

size

Small

DESCRIPTION

Use the Save the Rain Diverter to channel water from your downspout to your barrel or watering can. Constructed of galvanized steel for strength and durability. Diverter come in 2 sizes: Small 2 1/2 x 3 1/2 for downspouts that are smaller than 3 x 4" rectangular or 3" round and Large 3 1/4 x 4" for all rectangular downspouts greater than 3 x 4" or 4" round.

REVIEWS

Dimensions	Small 11L x 3W x 2.5H inches
	Large 11L x 4W x 3.25 H inches
Material	Galvanized Steel
Warranty	1 Year Warranty
Weight	Less than 2 lbs.

Selection

The small fits downspouts that are approx 2 x 3 inches or about 10-11 circumference and 3" round. The large fits downspouts that measure something greater than 3x4 or 14" circumference or a 4" round. the large diverter will not work with downspouts that are smaller the 3x4" or 4" round.

Details and Installation

- Draw a line on the downspout approximately 9 inches above the top of the rain barrel
- Move the barrel away
- Use a hacksaw and cut the downspout at the line or marking
- If the downspouts is a little larger than the diverter use needle nose pliers to crimp the edges so it will fit inside the diverter. A snug fit is good and will hold it in place.

Note:

if a downspout bracket is below your cut, remove the bracket and place it above the cut

- Attach diverter and set angle
- The diverter is designed so that you can crimp the sides of the downspouts to fit the diverter
- Tools needed: a hacksaw & measuring tape
